

This is a complaint against Sinclair Broadcasting and media consolidation. Sinclair is showing one-sided politics by airing an anti-Kerry documentary without following it up with an anti-bush documentary. This is unethical and in violation to their obligation to serve the public interest,

The dangers of media consolidation are clearly demonstrated by this situation. Large companies controlling the airwaves does little to uphold the values of community. At a time when communities could be discussing issues in the presidential campaign that effect them personally, there are getting more propaganda. It is the responsibility of a station using public airways to serve the public. One sided propaganda is self serving and destructive to democarcy.

It is too easy for companies such as Sinclair to do as they please. Please act to strengthen media ownership rules and to tie the license renewal process to the extent to which it serves the public and upholds their obligation to serve the public. Thank you.
